CLAIMS

1. (Original.) A display device having a display window with a principal surface, said display device comprising a magnetic loss layer formed on at least a part of said principal surface.

2. (Amended.) A display device as claimed in claim 1, wherein said magnetic loss layer is a granular magnetic thin layer with a magnetic composition comprising M, X and Y where M is a metallic magnetic material selected from the group consisting of at least one of Fe, Co, ~~and/or~~ and Ni, X being an element or elements other than M and Y, and Y being selected from the group consisting of at least one of F, N, ~~and/or~~ and O.

Cancel claims 3 and 4.

5. (Original.) A light emitting element having a light emitting window with a principal surface, said light emitting element comprising a magnetic loss layer formed on at least a part of said principal surface.

6. (Original.) A light emitting element as claimed in claim 5, wherein said magnetic loss layer is a granular magnetic thin layer with a magnetic composition comprising M, X and Y where M is a metallic magnetic material consisting of Fe, Co, and/or Ni, X being element or elements other than M and Y and Y being F, N, and/or O.

Cancel claims 7 and 8.

9. (Original.) A light emitting element having a light emitting window with a principal surface, said light emitting element comprising a meshed magnetic loss layer formed on at least a part of said principal surface.

10. (Original.) A light emitting element as claimed in claim 9, wherein said meshed magnetic loss layer is a granular magnetic thin layer with a magnetic composition comprising M, X and Y, where M is a metallic magnetic material consisting of Fe, Co, and/or Ni, X being element or elements other than M and Y, and Y being F N, and/or O.

Cancel claims 11-13.

14. (Original.) A plasma display panel having a front glass substrate with an outer surface, said plasma display panel comprising a sheet-like magnetic loss layer formed on said outer surface.

15. (Original.) A plasma display panel as claimed in claim 14, wherein said sheet-like magnetic loss layer is a granular magnetic thin layer with a magnetic composition comprising M, X and Y where M is a metallic magnetic material consisting of Fe, Co, and/or Ni, X being element or elements other than M and Y, and Y being F, N, and/or O.

Cancel claims 16 and 17.

18. (Original.) A plasma display panel having a front glass substrate with an inner surface, said plasma display panel comprising a sheet-like magnetic loss layer formed on said inner surface.

19. (Original.) A plasma display panel as claimed in claim 18, wherein said sheet-like magnetic loss layer is a granular magnetic thin layer with a magnetic composition comprising M, X and Y, where M is a metallic magnetic material consisting of Fe, Co, and/or Ni, X being element or elements other than M and Y, and Y being F, N, and/or O.

Cancel claims 20 and 21.

22. (Original.) A plasma display panel having a front glass substrate with an outer surface, said plasma display panel comprising a latticed magnetic loss layer formed on said outer surface.

23. (Original.) A plasma display panel as claimed in claim 22, wherein said latticed magnetic loss layer is a granular magnetic thin layer with a magnetic composition comprising M, X and Y, where M is a metallic magnetic material consisting of Fe, Co, and/or Ni, X being element or elements other than M and Y, and Y being F, N, and/or O.

Cancel claims 24-27.

28. (Original.) A plasma display panel having a front glass substrate with an inner surface, said plasma display panel comprising a latticed magnetic loss layer formed on said inner surface.

29. (Original.) A plasma display panel as claimed in claim 28, wherein said latticed magnetic loss layer is a granular magnetic thin layer with a magnetic composition comprising M, X and Y, where M is a metallic magnetic material consisting of Fe, Co, and/or Ni, X being element or elements other than M and Y, and Y being F, N, and/or 0.

Cancel claims 30, 31, 32, and 33.

34. (Original.) A plasma display panel having a front glass substrate with an outer surface, said plasma display panel comprising a striped magnetic loss layer formed on said outer surface.

35. (Original.) A plasma display panel as claimed in claim 34, wherein said striped magnetic loss layer is a granular magnetic thin layer with a magnetic composition comprising M, X and Y where M is a metallic magnetic material consisting of Fe, Co, and/or Ni, X being element or elements other than M and Y and Y being F N, and/or O.

Cancel claims 36, 37, 38, and 39.

40. (Original.) A plasma display panel having a front glass substrate with an inner surface, said plasma display panel comprising a striped magnetic loss layer formed on said inner surface.

41. (Original.) A plasma display panel as claimed in claim 40, wherein said striped magnetic loss layer is a granular magnetic thin layer with a magnetic composition comprising M, X and Y where M is a metallic magnetic material consisting of Fe, Co, and/or Ni, X being element or elements other than M and Y and Y being F N, and/or O.

Cancel claims 42, 43, 44, and 45.

46. (Original.) A plasma display panel having a front glass substrate with an outer surface, said plasma display panel comprising a specked magnetic loss layer formed on said outer surface.

47. (Original.) A plasma display panel as claimed in claim 46, wherein said specked magnetic loss layer is a granular magnetic thin layer with a

magnetic composition comprising M, X and Y where M is a metallic magnetic material consisting of Fe, Co, and/or Ni, X being element or elements other than M and Y and Y being F, N, and/or O.

Cancel claims 48, 49, 50, and 51.

52. (Original.) A plasma display panel having a front glass substrate with an inner surface, said plasma display panel comprising a specked magnetic loss layer formed on said inner surface.

Cancel claims 53-97.
